SOFTWARE ENGINEER

I am a WordPress developer with over five years of experience, specializing in custom theme and plugin development, e-commerce solutions, and advanced WordPress customization. Since 2018, I have successfully delivered more than 100 websites for various companies, showcasing my expertise in creating user-friendly, responsive, and functional designs. My goal is to bring innovative solutions to every project, ensuring the best results for clients.

Apart from programming i also love astronomy.

In my spare time i like to read about artificial intelligence and the cosmos.

STRENGTHS AND EXPERTISE

WordPress Security	Custom Widget Development	

PROFESSIONAL EXPERIENCE

Handy Web Lab Ltd.
WordPress Developer

May 2024 - Present

In this company my major responsibility is to maintain the clients requirements. After discussing with the client first I have to create the website mockup and it's functionality in Figma according to his/her requirements then the converting it to HTML template and then converting that HTML template to WordPress using Elementor page builder. And if necessary then convert that HTML template to WordPress Theme. And ensure that all of this HTML template and WordPress Theme`s are filling up the Themeforest requirements and responsive in every devices. .

Accomplishments till now :

- I`have done 150+ figma to elementor conversion..[examples are available on my portfolio].
- Completed 3 HTML to WordPress Theme conversion.
- Have successfully completed 2 challenging figma to elementor conversion. In this two websites there are multiple sections which has completely different design in Mobile, Tablet, Desktop, Laptop, and wide screen.

**Webflow Developer---Intern
WhiteFrame Creative**

February 2024 - April 2024

I was an intern in this company. In this company my responsibility was to learn how webflow works and maintain and manipulate HTML, CSS, JavaScript elements within Webflow to bring website designs to life, ensuring cross-browsing compatibility and mobile responsiveness, also use custom javascript and javascripts libraries when needed. And design Figma mockups for clients

Accomplishments:

- Have completed 2 portfolio,, 1 Blog website, 4 travel agency website.

**WordPress Developer
ICT Consulting ltd**

Aug 2020 - July 2023

In this company responsibility was to create landing pages using elementor or divi page builder. I have worked on Website redesign , E-Commerce website design and adding payment systems, Woo-Commerce functionality, website speed optimization , yoast SEO, mailchimp and maintaining e-commerce website.

Accomplishments:

- Created more than 50 websites in wordpress including E-Commerce , Landing Pages, PortFolio, Blog websites.
